NURSING PROGRAM OUTCOMES

At the completion of this program, the graduate will be able to:

- 1. Practice within the ethical and legal framework of the profession of nursing.
- 2. Communicate effectively with patients, families, other individuals significant to the patient, and health team members.
- 3. Assess holistically the health status of patients and the factors necessary to assist patients in adapting to changes in health status.
- 4. Utilize evidenced based practice to demonstrate sound clinical judgment and decision making that ensures holistic, accurate, and safe nursing care.
- 5. Provide caring interventions to patients, families, and other individuals significant to the patient.
- 6. Employ effective teaching strategies to provide relevant health instruction to achieve desired learning outcomes.
- 7. Engage in collaborative practice with patients, families, other individuals significant to the patient, health team members, and the community across the wellness-illness continuum.
- 8. Manage care effectively to meet the needs of patients transitioning within and across health care settings.
